Does your “Energy Field” need an overhaul?

by Carol Keppler

We’ve all heard of auras and admitted to the possibility of the physical body having an aura or luminosity that can actually be seen by some gifted individuals—and “read”, no less.

I have to say that I’ve been intrigued by the thought, which prompted me to have aura photos taken on a number of occasions; all said the “greens” told of healing in my energy field which was all the more fascinating considering none of these aura photographers knew me. One camera, a \$35,000 model, produced a photograph of a pearly white haze which when retaken wearing my electro-protective Maltese Medalion hanging at my heart chakra, resulted in a photo only a little better with the exception of the golden glow encircling this piece of therapeutic jewelry.

Recently, while working with an Intuitive Questioning Technique (IQT) my interest peaked when we discovered that many who have used energy medicine for deep cellular cleansing had progressed beyond the rating system we were using of “Complete Balance” of homeostasis at the physical level.¹ When we checked the possibility that the cellular output might have cleared *beyond the level of the physical body*, we were surprised to discover, again using IQT, that cleansing had progressed through all four known energy bodies (etheric, mental, casual, and astral), as described by energy medicine pioneer, Richard Gerber, MD, and others.

Intuition to the rescue

A dilemma now presented itself in as much as there was a strange collection of symptoms presenting themselves in our society that neither allopathic nor natural alternatives had been able to fully address. These included but were not limited to *brain and lung damage, memory loss, fibromyalgia, muscle spasms, “auto-immune” diseases, acute nerve degeneration, blood abnormalities, stomach problems, extreme fatigue, cataracts, hearing and sleep problems, soft tissue sarcoma, tumors, irritability, recurring headaches, and inability to learn* as well as *multiple types of cancer, nerve and psychiatric problems*. All this damage we have recently learned has been caused by the radiation of our wireless age. And we could go on, which I’d comment that with all these symptoms still unresolved, there must be more than four energy bodies in the human Energy Field where this radiation (and who knows what else), was hiding. This, by the way, is how the intuitive process works, by first questioning then downloading the information as it comes through; scientists, researchers, great doctors, healers, inventors, teachers and savvy business people, whether they are aware of it or not, all use this intuitive process. Once the cells are cleansed we see that everyone has this high degree of intuitive sense—it’s our birthright!

Through the Intuitive Questioning Techniques we found what seems to be the existence of multiple energy bodies and by checking the clarity of each body beyond the known four. We found not ten, not one hundred, but *one thousand subtle energy bodies in the human Energy Field*. Was this possible? I called on a “Master” in Sedona to ask; he laughed and answered, “Probably way more than that!” You can help us by checking our findings by dowsing or through applied kinesiology. Acid pH still a problem? If you are taking acid blockers (Axid, Pepcid, Tagamet, Zantac or digestive enzymes) you still have an

acidic pH, the basis for all disease. Call for feedback—it may be radiation! (see article pg. 1) **The Ultimate last minute gift** is a phone call away. Ask for an **Angel Gift Certificate** in any amount and we'll even mail it out for you. Call now—602-966-9753 or 800-971-4458

Focus on **Quantum Waters™**

Step 4™ ...the fourth cleansing formula in the **Quantum Waters™ Four Step™ System**.

When **RegenerationDaily™** and **MicroEnhancer™** closed down (would receive no more frequencies), we began putting new frequencies in **Step 4™**. These were designed to neutralize toxins that were preventing cells from self-repair. In addition, we found the frequencies of **radiation poisoning** at the farthest reaches of the Energy Field; the "root cause" of your unresolved health issues may be radiation! Learn more in the feature article on page 1.

Symptoms: an acid system, continuing symptoms of yeast, emotional instability, phobias, infections (especially teeth and gums), digestion, sleep, T-cell production, low vital-life energy, hair loss and more.

Intuit: 10 half-droppers for 1 to 7 days. *Sensitive?* Use 1 drop per quart.

Speed up the repair process with **Emergency™** (5 half-droppers) one time along with the **RegenerationDaily™** dosage for a difficult situation. This can cut time 1/3 to 1/2.

MRSA, a type of streptococcus bacterial infection, has killed more people in the U.S. than AIDS. It is antibiotic resistant, the media warns us. *No problem*—**RegenerationDaily™** neutralizes this super-bug in 3 to 7 days. **Symptoms:** a deep red boil, pimple, scrape or wound.

Your pet is poisoned—what to do!

Ever catch your pet chewing on grass? Animals are so smart—birds know when to fly south and how to build nests while bees build intricate beehives and ants tunnel “homes”. All animals instinctively know how to birth a baby and care for it. Did you know that before the tsunami hit, the animals had already left for higher ground—none died. So what happened to our human species???

The key word is “instinct”—animals “know” instinctively and at one time humans knew—our God-given knowingness is called “intuition”. Same thing, but, stolen from humanity by the toxic world we live in. The symptoms of toxicity (read that “poisoning”) for both animals and people are pretty much standard: **Nausea** to which the animals respond by *eating grass making them vomit the offending substance*, usually in the middle of your carpet or your bed. You may have seen little pots of grass for cats.

Now you know it’s not to fill a nutritional need—*they are toxic!*

Poisoning is difficult if not impossible for a veterinarian, or physician for that matter, to detect. Both tell us they must rely on symptoms or your knowledge of a possible source of poisoning.

We asked a veterinarian, Dr. Peter Rodgers, a mobile vet in Colorado, for symptoms to look for: **vomiting, diarrhea, drinking more water/voiding more, rash, itching, chewing paws, salivating, agitated or lethargic, won’t eat, sleeps more. If the nervous system is impacted look for trouble walking**

When in doubt about the onset of symptoms, whether they appear over a long span of time (due to your move to a new home, most probably built with toxic materials), or come on suddenly (due to a reaction to your cleaning supplies), *be*

“Until one has loved an animal, a part of one’s soul remains unawakened.”

aware and act quickly to neutralize the poisoning. This is imperative!

When the cause of symptoms is unknown, energy medicine comes to the rescue with formulas that can hold hundreds and sometimes thousands of herbs and other “naturals”, many of which are *detoxifiers*. Fast, easy and effective, frequency medicine is the medicine of the future, not just for pets, but for their people, too.

Think your pet has been poisoned?
Intuit **Emergency™** or **RegenerationDaily™** (or both for faster action) 1 half-dropper in mouth every 5 minutes for 1 hour.

So Many Great Books . . . so little time

“The Alchemist”

by Paul Coelho

Every few decades a book is published that changes the life of its readers forever. The Alchemist is such a book, a magical tale of Santiago, a shepherd boy who yearns to travel in search of treasure. And treasure he finds as he learns to listen with his heart, read the “omens” along life’s path and above all, to follow his dreams—all lessons for use...

“...the liquid part of the Master Work...was the Elixir of Life, it cured all illnesses; it also kept the alchemist from growing old.”

“When you possess great treasures within you, and try to tell others of them, seldom are you believed.”

“...intuition is really a sudden immersion of the soul into the universal current of life, where the histories of all people are connected, and we are able to know everything, because it’s all written there.”

“In order to find the treasure, you will have to follow the omens. God has prepared a path for everyone to follow. You just have to read the omens that He left for you.”

“We have to take advantage when luck is on our side and do as much to help it as it’s doing to help us. It’s called the *principle of favorability*. Or beginners luck.”

“That’s what alchemists do...when we strive to become better than we are, everything around us becomes better too.”

“...when a person really desires something, all the universe conspires to help that person realize his dream.”

“The boy understood. Another person was there to help him toward his Personal Legend... You already know all you need to know. I am only going to point you in the direction of your treasure.”

“There’s nothing you can sing, that can’t be sung”

Energy Field Overhaul

A healthy body depends on the proper functioning of its 75 trillion cells. Healers know this and work at the level of the physical body using herbs, homeopathics, massage, colonics, BEFE footbaths, saunas, wraps and more. Even energy medicine was targeted to the “physical body”. Unresolved health challenges, however, soon prompted the addition of new frequencies to the formulas, which immediately bumped readings off the charts and into the Energy Field. Because there were people who still had unresolved health issues, it became obvious that the Energy Field was holding *seriously toxic levels of poisoning, chaotic electric and especially radiation*. According to Gerber and before him, Samuel Hahnemann, the father of modern homeopathy, much illness is caused by the leaching of toxic miasms back into the body from the subtle energetic levels of the Energy Field and very possibly this might be the root cause of “all chronic disease”.

True energy workers have an understanding of the process needed to cleanse beyond the physical body to the subtle bodies of the Energy Field. Now we were beginning to understand why answers can't always be found in diet changes to “natural”, raw eating or drinking green drinks; nor with all the liver, gallbladder, colon and blood cleansing. And certainly not with any allopathic therapies!

Energy medicine may be one of the few ways the human body can experience a cleansing through what we're calling the “Infinite Energy Field” (IEF). More research must be done in this emerging science of neutralizing toxic miasms in an expanded energy field and energy medicine may well be part of the answer. When symptoms linger, an aura overhaul may be the answer, a possibility that is truly far out!

WELCOME ABOARD, Sunny Gil

This is an exciting time for QuantumWaters and Energy Medicine Foundation. We're hard at work taking the dream of EMF into concrete reality. The newest member of our 'dream-into-reality-team' is Carol's Executive Assistant, Sunny Gil.

“Seeing things transform and grow has always been the major focus of my life”, says Sunny who comes to us with twenty-five years of experience helping small businesses and individuals put their dreams into play. She was a moderator and writer for a major net forum.

Sunny, when asked what terms she would use to describe her life used the term *creative practicality*.

“A teacher”, she said, “once told me that the equation for Magic was Order + Joy. In my life, I have found that to be true over and over again.”

Post college years spent traveling and teaching English and American culture to executives in South America gave her a new perspective that there was not just *one way* to look at a challenge. It also showed her the value of careful infrastructure that makes any process work well in the long run.

Later, that same focus came to be applied to business enterprises as diverse as Small Business Administrative and recruitment companies, the seeking of grants and funding for a small start up hospice, assisting the start up of a learning based product company, doing marketing for companies in the alternative health care industry and taking an owner's dream from the idea stage through the complete lifecycle into a functioning business.

When asked, ‘Why EMF?’ Sunny opened her eyes wide and told me that if I'd ever used energy medicine then I wouldn't need to ask.

‘I can't wait to see the transformation that EMF will make on how everyone accesses and LIVES well’, she says, as she picks up the paper that might hold a key to the next step for EMF's dream made reality.

Sunny is multi-talented and is already working on fund raisers, grants, CEU's and marketing projects designed to take this organization to the next level.
